

2016 Services for Sheep Producers

AgInnovate uses the latest precision management technology and systems to provide a range of specialist sheep services designed to improve the on-farm productivity and profitability of your sheep enterprise.

Services range from one-off advice through to subscription packages that include on farm visits and reports, telephone support, regular targeted newsletters and closed group social media feeds.

AgInnovate offers a range of tailored services to WA sheep producers, on either an individual or group basis.

Sheep Advisory Packages

To help you achieve your sheep enterprise goals, we're pleased to be able to offer a range of different packages, so you will be sure to find one that suits the individual requirements of your business.

On-farm services in the Sheep Advisory packages include:

- Implementation of electronic identification (eID) management systems
- Planning the production cycle
- Pasture assessments, condition scoring and feed budgeting
- Identifying or refining your breeding objectives
- Ram and ewe selection including integration of ASBVs into your breeding objective
- Pasture and fodder production
- General husbandry

Electronic Livestock Identification

AgInnovate is a leader in the provision of training, support and supply of electronic identification systems for livestock in WA. We work with all major suppliers, including Allflex and Shearwell for tags, Gallagher and Trutest for hardware and Sapien Technologies for software and Pedigreescan systems.

AgInnovate can provide a systems solution that suits your flock size and management requirements.

We can assist you with all of your eID requirements, including:

- Selection and purchase of tags, hardware and software systems
- On-farm setup and remote support
- Integration with your current system
- Identification of the data you really need, not just collecting data for data's sake
- Data processing and reports
- Barcoding for DNA blood cards and individual worm egg testing
- Provision of in-shed fleece recording services by arrangement
- Hire of hardware including in-shed fleece recording gear, stick readers, weigh scales and Pedigreescan panels

Speak with Jonathan about your individual eID requirements. Packages can be adapted for eID implementation or additional eID services can be charged at normal consulting rates.

Training Courses

AgInnovate is a leading provider of group training in WA. We can assist your group with your livestock training requirements. We are qualified deliverers for:

- Lifetime Ewe Management
- High Performance Weaners
- Bred Well Fed Well
- Sheep CRC eID Implementation & Maintenance

If you have a group of farmers interested in livestock training in your area, please contact us to organise a training solution.

Sheep Performance Trials

AgInnovate works with breed societies, farmers and grower groups to set up and manage progeny trials.

How to get more information
